Java Full Stack Developer
Full Stack Development,Project Management,Support Activity
Industry Domain: Telecommunication,OSS/BSS,Banking,E-commerce,Healthcare,Education,Warehouse

*A self motivated, dedicated ,***Software Developer** offering over **2+ years** of Experience in in delivering highly scalable solutions. Experienced Software **Development and Maintenance** Activity, Proficient in **Java, Spring, Spring Boot and Microservices** Architecture. Having expertise in database like **oracle sql, mysql,e**tc. Skilled in utilizing **Apache, tomcat,Oracle** Sql server . Committed to staying updated with the latest technology trends and capable of providing innovative solutions. Proven track record in delivering high quality software products. Seeking challenging opportunities to utilize my skills and contribute to organizational success.

P R O F E S S I O N A L   S U M M A R Y

- 2+ years of Hands-on Experience in software development using **Java** technology.
- Working experience on **Java 1.8** features.
- skilled in databases using **MySQL** .
- good understanding of **Spring IOC**, **Spring MVC**.
- Hands on Experience in Web application using **Spring boot** .
- expertise in Producing and consuming the **rest API**.
- Proficient in **Hibernate mapping**.
- Worked in **E-commerce Domain**.
- Exposure in design the **custom exception**.
- Skilled with creation of **Web services** using **REST**.
- Work Experience on **Apache tomcat**.
- Good exposure about **Exception Handling**.
- Familiar with **JDBC, JSP** & **Servlet**.
- A very good team player with **excellent communication, Presentation and reporting skills**.
- Adequate knowledge about **version control tool Git**, **SVN**
- Compressive knowledge in project management tool like a **JIRA**.
- Dealing with **pom.xml** file to add **maven** dependency.
- Professional in designing the different document such as **Manual, developer guide, Rest API guide** etc.
- Working as a **Java backend developer**.
- Expert in **Core Java, OOP's Concepts, String class, Arrays along with Collections Framework**.

Others	:	Data Structures and Algorithms ,OOP's Concepts ,Exception Handling ,Collections Framework, Stream API,REST API ,Microservices.

K E Y   A C H I E V E M E N T S

- Have given the guidance to the team as well worked with team for providing the security to the end user data in database using prepared statement (provided the security for SQL injection) thought whole project.
- Had leaded an end-to-end project of WAREHOUSE MANAGEMENT having team size of 3members, where I have managed other 3 members and guided in whole project management activity like coding, debugging, database management and deployment as well.
- Created the custom exceptions for entire application so that the entire flow of the program should be maintained

properly and the user should be able to see proper error message whenever there occurs exception.
- Implemented the concept of Inversion Of Control to overcome dependency injection in entire project to achieve loose coupling so that the confidential code will not be shared with the third party software .

P R O J E C T S H A N D L E D

- *Warehouse Management System 2024*   *-2025*
  .
  - ✓ Developed backend functionality for Warehouse Management system using **Java and Spring Boot**, **Hibernat** improving inventory tracking, stock movements, warehouse locations, and reducing the risk of stockouts or overstocking.
  - ✓ Optimized **MySQL** database queries for better inventory control, improving data retrieval speed for tracking stock movements, warehouse locations, and reducing the risk of stockouts or overstocking
  - ✓ Worked as team player.
  - ✓ Requirement analysis for project and design plans.
  - ✓ Coding and manual testing as per requirements.
  - ✓ Producing the restful web services.
  - ✓ Bug fixing.
  - ✓ Involved in knowledge sharing activities with team.
  - ✓ Preparing the technical specification document based on existing system and new design changes.

- *Product Catalog Application*   *2022 -2023*
  - ✓ Developed an E-commerce web application using **java**, **spring boot**, **MySQL** and **AngularJS** that allows the user to register, login, search product and filter the output accordingly.
  - ✓ Implemented **CURD** operation on products for the users using MySQL database.
  - ✓ Utilized the Rest API's to provide seamless integration between the frontend and backend of the application.

C E R T I F I C A T I O N S
  - ✓ **Java (Basic)- HakerRank**
  - ✓ **JavaScript(Basic)-HakerRank**
  - ✓ **SQL(Basic)-HakerRank**
  - ✓ **Basic to advanced Microsoft Excel- Skill Nation**
